Advancing science for life™

Rezūm nights without bathroom breaks.

Rezūm™ Water Vapor Therapy is a natural alternative to surgery. It treats the cause of your BPH, so you can get back to your life.

Seeking lasting relief from BPH symptoms?

Waking up at all hours to urinate?

Weak stream?

Having the urgent need to go?

Side effects of BPH meds?

What if there was a better way to get to the root cause of your BPH and experience significant, lasting relief?

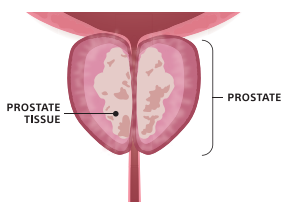

Rezūm Water Vapor Therapy treats the source of Benign Prostatic Hyperplasia (BPH) – your enlarged prostate. This short, in-office procedure uses the natural energy stored in a few drops of water to shrink the prostate. So urine can flow freely. There are no incisions, no general anesthesia, and most patients return to regular activities within a few days.* And, it preserves sexual function.^{1,2}

Rezūm leading your life to the fullest. Why wait?

Rezūm Water Vapor Therapy is a short, in-office procedure that uses the natural energy stored in water vapor, or steam, to shrink enlarged prostates.^{1,2}

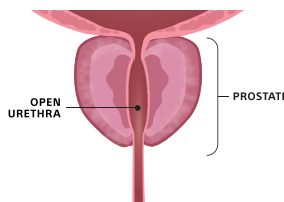

Rezūm Therapy is typically performed right in your urologist's office, or at an outpatient surgery facility. During each 9-second treatment, sterile water vapor is released throughout the targeted prostate tissue. The number of treatments varies depending on the size of your prostate. Over time, your body's natural healing response absorbs the treated tissue, shrinking the prostate. With the extra tissue removed, the urethra opens, reducing BPH symptoms. Most patients begin to experience symptom relief in as soon as two weeks, and maximum benefit may occur within three months.*^{1,2}

Patient responses can and do vary.

Before

An enlarged prostate can squeeze the urethra, making it difficult to pass urine from the bladder.

After

Following treatment with Rezūm Therapy, your body heals and the extra tissue is gone, the urethra opens and urine can flow freely.

Why choose Rezūm Water Vapor Therapy?

If you're suffering from BPH, Rezūm Therapy offers many benefits.

No more BPH medication and their side effects³

Preserves sexual function¹

Clinical studies show that Rezūm Therapy relieves symptoms safely/effectively^{1,2}

Ability to return to regular activities within a few days^{1,2}

Most patients see symptom improvement within two weeks^{1,2}

Symptom relief that lasts¹

In-office/outpatient therapy¹

No permanent implant

Does not require general anesthesia¹

FDA cleared; Included in the American Urological Association guidelines

Watch a video about BPH and Rezūm Therapy

Follow these easy steps:

1. Open your phone's camera app
2. Point the camera at the QR code square and your phone will recognize the code
3. Tap the alert at the top of your screen to play the video

Some phones may not have the QR code support via your camera. Simply type in **Rezūm.com/Video** to your browser to view the video.

All treatments have inherent and associated risks. The Rezūm System is intended to relieve symptoms, obstructions, and reduce prostate tissue associated with BPH. It is indicated for men ≥ 50 years of age with a prostate volume $30\text{cm}^3 \leq 80\text{cm}^3$. The Rezūm System is also indicated for treatment of prostate with hyperplasia of the central zone and/or a median lobe. Potential risks include but are not limited to painful urination (dysuria), blood in the urine (hematuria), blood in the semen (hematospermia), decrease in ejaculatory volume, suspected urinary tract infection (UTI), and urinary frequency, retention or urgency. You should talk with your doctor about benefits and risks before moving forward with any treatment option.
